

19 October 2020

Dear Families,

As we are now a few weeks into the new academic year, I would like to take this opportunity to share more information with you regarding the science curriculum for Year 9 students. We have been impressed by the strong start to the year that has been made by Year 9, with students making a very positive impression on our new members of staff, Miss Pike (Assistant Curriculum Leader), Mrs Price and Miss Saunders. Our talented and committed team is at your disposal should you have any science-related questions.

As in previous years, we recommend that families of Year 9 students purchase the required practical lab books to support students through their course of study. These books cover the full three years of the course. They are fantastic at making required practical experiments memorable and learning more efficient, allowing more effective understanding and promoting better outcomes. We will be using the books in lessons when demonstrating or conducting required practicals.

These books are now available to purchase on ParentPay. We ask that all payments are made online as cash payments present us with additional Covid-19 challenges. Students will need a separate Biology, Chemistry and Physics book (£3.15 total).

Once purchased, books will be kept at school to ensure their safekeeping. They will be returned to the students in Year 11 to help them with their GCSE revision.

If your child is in receipt of Pupil Premium and you would like to request financial support, please contact me by email via your child's school base email account.

If you have any further queries, please do not hesitate to get in touch.

Yours faithfully,

Dr S Jakoby
Curriculum Leader for Science

The Misbourne continues to be a Good School:

"A culture of ambition permeates the school; students are at the heart of everything the school does"
